/ WORK EXPERIENCE

>> Junior Software Engineer

Capgemini Engineering | Sep 2022 - May 2023

- > Worked on projects with the following tech stack: Docker, FastApi, SQLAlchemy, Alembic, PostgreSQL, Poetry.
- > Implemented projects from scratch by setting up Docker, and CI/CD Pipelines and coding well documented REST APIs for our frontend team.
- > Filtered and managed big data coming from the data engineers to deliver easy to understand and industry standard APIs.

>> Software Engineer Intern

Capgemini Engineering | Jul-Aug 2022

- > Created a UrlShortener type of app from scratch using Docker and Django for the backend REST APIs and Django template language + CSS3 for the frontend.

/ EDUCATION HISTORY

>> University of Bucharest, Computer Science

Bucharest | Oct 2021 - Present

- > Relevant Courses:
